Product Catalogue 2026

Coconut Coir & Coco Peat Products, Exported from Sri Lanka

Coco Grow Cubes | Coco Grow Poles | Cocopeat Grow Discs & Pellets
Coir Pots & Basket Liners | Weed Control Mats

Adhie Exports & Trading (Pvt) Ltd
Coconut Coir & Coconut Peat Exporter

About Adhie Exports

Sri Lankan manufacturer and exporter of coconut coir and coco peat products

Adhie Exports & Trading (Private) Limited is a Sri Lankan manufacturer and exporter specialising in coconut coir and coconut peat-based horticultural products. Operating from Kurunegala, in Sri Lanka's North Western Province, we transform coconut husk into sustainable growing media and garden products used by nurseries, commercial growers and hydroponic farms worldwide.

Why choose us

- 100% natural, organic and biodegradable raw material sourced and processed in Sri Lanka
- OEM / ODM / Private Label manufacturing available
- Fully customisable sizes, packing and specifications
- Consistent quality control: low moisture content and controlled EC levels
- Reliable export experience and worldwide shipping

Services

OEM, ODM and Private Label; custom sizing, thickness, moisture/EC levels and packaging; flexible packing (naked, cling-wrapped, shrink-wrapped, netted or cartoned); consistent supply for all farming seasons, with export shipping arranged from Sri Lanka.

Coco Grow Cubes

Premium cocopeat seedling cubes for plant nurseries

Adhie Coco Grow Cubes are crafted from premium cocopeat, an exceptional seedling base for root development. Designed primarily for plant nurseries, they significantly reduce the rejection rate of nursery plants. With independent control of water and fertilization during the seedling phase, the cubes minimise transplant risk, and they can be placed directly onto the growing media in later stages, saving time and money.

The cubes are 100% organic and made from natural, sustainable cocopeat sourced and processed in Sri Lanka. Their porous structure improves nutrient absorption, and their high buffer capacity retains water that plants absorb as needed throughout the seedling stage.

Key advantages

- Promotes rapid, dense root growth
- Excellent growing control for precise nutrient absorption
- 100% organic and environmentally friendly
- Nutrients readily absorbed due to the porous structure
- Reduces rejection rate of nursery plants
- Ideal for plant nurseries and seedling development
- Compatible with coco peat growing media
- Minimizes risk and improves seedling success

Product specifications

Product name	Coco Grow Cubes
Brand	Adhie Exports & Trading (Pvt) Ltd
Material	Cocopeat
Type	Cubes
Moisture	Less than 20%
EC Level	For seed germination
Used with	Flower / green plant
Plants	Flowers, fruits and vegetables
Size	10x10x8 cm, 8x8x6 cm, or as per buyer's preference
Packing	Cling wrap (polythene) or naked
Season	All farming seasons
Services	OEM / ODM / Private Label
Customization	Possible — specifications can be changed as per buyer's preference

Request samples and a quotation: info@adhieexports.com | WhatsApp +94 77 454 2610. Specifications can be customised to the buyer's requirements. OEM / ODM / Private Label available.

Coco Grow Poles

Natural coir support poles (moss sticks) for climbing plants

The Adhie Coco Pole (also known as a coir pole or moss stick) is a support pole for potted plant creepers, suitable for indoor and outdoor gardens. It is made by wrapping natural coir fibre, in mattress-fibre, rubberized coir pad or coir yarn form, around a hollow PVC or wooden core. Poles support vines, shrubs and other plants that need protection while growing, and are widely used in nurseries and horticulture farms.

The pole's high moisture retention lets plant roots grip the natural organic coir mattress. Adhie Coco Poles are available in a range of diameters and lengths to suit any application.

Key advantages

- Porous with high water-holding capacity, helping plants develop many tiny roots across the surface
- Plants grow healthier when supported with coir poles
- Easily installed and a reliable replacement for traditional moss sticks
- Gives ideal support while maintaining a moist environment for roots
- Well suited to creepers and ornamental plants indoors, on patios or in the garden

Product specifications

Product name	Coco Grow Poles
Brand	Adhie Exports & Trading (Pvt) Ltd
Material	100% coir wrapped on a PP or wooden pole
Size	Height 40cm–180cm; diameter 25mm–50mm (custom available)
Colour	Natural brown
Feature	Sustainable, eco-friendly, biodegradable
Usage	Support for vines, shrubs and other plants needing protection while growing
Packing	25 pcs per bundle
Services	OEM / ODM / Private Label
Customization	Possible — specifications can be changed as per buyer's preference

Request samples and a quotation: info@adhieexports.com | WhatsApp +94 77 454 2610. Specifications can be customised to the buyer's requirements. OEM / ODM / Private Label available.

Cocopeat Grow Discs & Pellets

Compressed coco peat discs and pellets for fast, clean germination

Adhie Coco Peat Discs are ideal for individual, quick seed germination and are widely used in home gardening and nurseries, especially Gerbera and Orchid nurseries. This quality compressed disc is specially treated for excellent results with potted plants and suits home and commercial hydroponics. Each disc fills a 1–2 litre pot when re-hydrated. We supply naked discs, individually shrink-wrapped units, or bulk shrink-wrapped packs.

Adhie Coco Pellets are made from the same premium coco peat: 100% biodegradable, porous, and high in water retention, which promotes rapid root growth. Add water and the pellet expands to several times its size. As the plant develops, transfer it straight into the growth medium or a grow cube.

Key advantages

- Facilitates quick, individual seed germination
- Maintains loose, airy soil for better root growth
- Excellent water absorption and retention, reducing watering frequency
- Biodegradable and environmentally friendly
- Convenient, mess-free alternative to traditional soil
- Promotes successful transplanting with minimal shock
- Suitable for home gardening, nurseries and commercial hydroponics
- Chemical-free and safe for plants and the environment

Product specifications

Product name	Cocopeat Grow Discs & Pellets
Brand	Adhie Exports & Trading (Pvt) Ltd
Type	Coconut peat
Form	Disc / pellet
Moisture	Less than 20%
EC Level	As per customer specification
Use	Home gardening, nurseries, hydroponics
Plants	Orchids, bromeliads, gerbera, anthurium, clivia, roses, herbs and vegetables
Packing	Shrink wrap, colour label insert, PP net, or naked
Size	Discs: 6, 8, 10 cm diameter. Pellets: 25mm–60mm, or as specified
Season	All farming seasons
Services	OEM / ODM / Private Label
Customization	Possible — specifications can be changed as per buyer's preference

Request samples and a quotation: info@adhieexports.com | WhatsApp +94 77 454 2610. Specifications can be customised to the buyer's requirements. OEM / ODM / Private Label available.

Coir Pots & Basket Liners

Biodegradable coir pots and hanging-basket liners for shock-free transplanting

Adhie Coir Pots are made from coconut fibre from the outer layer of the husk, bonded with natural latex. Fully biodegradable, they are widely used in horticulture, ornamental, vine and tree nurseries and in domestic gardening. Their high permeability to water, air and roots gives faster cultivation, an excellent root system and re-establishment without transplant shock, even in cold, drought or adverse seasons. Pots come in different sizes, for manual or automated soil filling, and pair well with our Coco Discs.

Adhie Coir Basket Liners come in rubberized and needled coir types. They give excellent drainage and aeration, preventing root rot, and are a cost-effective, biodegradable alternative to expensive hanging baskets.

Key advantages

- 100% biodegradable, turning into organic matter on decomposing
- Holds more water for faster cultivation and shock-free re-establishment
- Good root protection with no deformity in the root system
- Roots penetrate the pot walls; air contact naturally prunes aerial roots
- Suitable for indoor and outdoor plants, including hydroponics
- Basket liners hold moisture while allowing drainage and air circulation
- Display plants on walls, under windowsills or on deck railings

Product specifications

Product name	Coir Pots & Basket Liners
Brand	Adhie Exports & Trading (Pvt) Ltd
Material	100% coir and latex
Type	Flowerpot / basket liner
Use	Home gardening, greenhouses, garden decoration
Colour	Natural light brown; liners also in black
Size	Pots: as required. Liners: 20, 25, 30, 35, 40 cm top diameter
Packing	Cling wrap, naked, or cartons
Season	All farming seasons
Services	OEM / ODM / Private Label
Customization	Possible — specifications can be changed as per buyer's preference

Request samples and a quotation: info@adhieexports.com | WhatsApp +94 77 454 2610. Specifications can be customised to the buyer's requirements. OEM / ODM / Private Label available.

Weed Control Mats

Biodegradable coir mulch mats that protect young trees

Mulching around trees helps young trees get the nutrients they need in early development while suppressing weeds around the root system. In the first three years, young trees rely on moisture in the growing medium to carry minerals to the roots; weeds compete for that moisture and slow growth.

Adhie Weed Control Mats suppress weeds so moisture reaches the tree. They also stop the growing medium drying out and cracking, which speeds water loss, letting the full root system establish for fast, healthy growth.

Key advantages

- 100% biodegradable, turning into organic matter on decomposing
- Conserves water and insulates, moderating moisture around plants
- Easily installed around trees; protects against weeds and soil erosion
- Tough, flexible bonded mat that passes air, water and nutrients but blocks weeds and grass
- Promotes seedling growth and reduces plant mortality
- Improves soil health, productivity and erosion resistance

Product specifications

Product name	Weed Control Mats
Brand	Adhie Exports & Trading (Pvt) Ltd
Type	Rubberized coir sheet
Form	Mats
Material	Coir fibre
Thickness	800, 1000, 1200 gsm
Packing	Cling wrap (polythene) or naked
Size	10cm to 90cm, or as per customer requirement
Services	OEM / ODM / Private Label
Customization	Possible — specifications can be changed as per buyer's preference
